

H1 Heading

Plugin for Joomla! 3, 4 & 5

This manual documents **version 8.x** of the Joomla! extension.

<https://www.aimy-extensions.com/joomla/h1-heading.html>

1 Supported Joomla! Versions

Aimy H1 Heading supports Joomla!...

- 3.9 and up,
- 4.0 and up,
- 5.0 and up.

2 Installation

The installation of the extension follows the common Joomla! procedures.

In case you are not familiar with these procedures, proceed as follows:

1. Download the extension's ZIP archive
2. Log into your Joomla! backend as "Super User"
3. From the menu, choose "*Extensions*" → "*Manage*" → "*Install*"
4. Click on the "*Or browse for file*" button and select the ZIP archive

The extension's archive will be uploaded and installed afterwards.

For further information, please have a look at the Joomla! documentation "*Installing an Extension*".

NOTE: All plugins are disabled by Joomla! when installed for the first time. To enable Aimy H1 Heading, proceed and configure the plugin.

3 Configuration

After a fresh installation, click on the "*Configure plugin now*" button on the installation report page.

At any time, you can configure the Aimy H1 plugin using Joomla!'s Plugin Manager by choosing "*Extensions*" → "*Plugin Manager*" from the menu. Locate the plugin and click on its name in the "*Plugin Name*" column of the plugin listing.

3.1 Enabling the Plugin

In order to use the plugin's functionality, you have to enable it first.

To do so, change the plugin's status from "*Disabled*" to "*Enabled*" and apply your changes by clicking on either the "*Save*" or "*Save & Close*" button in the toolbar.

The default configuration of Aimy H1 Heading will take care of upgrading the first **H2** heading to an **H1** one automatically.

3.2 Plugin Options

Aimy H1 Heading's functionality can be suited to your needs using the following configuration options:

System - Aimy H1 Heading

system / aimyh1heading

Adds missing H1 headings

Work on...

Complete Page

Component Output

Show context

Yes

No

Exclude these contexts

com_content.category
com_content.archive
com_content.featured

Check H1 headings

Yes

No

Work on...

This option allows to choose which HTML code the plugin should work on.

Choose either...

Complete Page

...to fix the first H2 in the complete page (recommended) or...

Component Output

...to fit it only in the page's component output.

Show context

This option helps you to find the contexts you might need in the exclude patterns.

If enabled, a box is displayed on each page in the frontend of your website that shows the name of its context.

Please remember to disable this option when you have finished the configuration.

Article 1

Category: [Blog](#)

Exclude these contexts

With exclude patterns you can define, on which pages Aimy H1 Heading should not change the heading to H1.

The contexts are given as a list with one context per line.

NOTE: A context consists of the internal component and view name, that generate the page's output, separated by a full-stop, i.e. `com_content.category`.

NOTE: You can use wildcards like `com_contact.*`.

Check the number of H1 headings

If enabled, the number of H1 headings present in the current *component output* is checked in the frontend. If there is more than a single H1 heading, any of these will be visually highlighted.

Please remember to disable this option when you have finished testing.
